| | | | | | | | | | | |
| Department of Fisheries and Aquaculture, Ministry for Agriculture, Fisheries and Animal Rights | N/a | A scientific study to improve trawl gear selectivity | This operation includes a desktop study, marine surveys and analysis of data so as to improve the gear selectivity of the 40mm square mesh size currently in use by the Maltese otter board trawling fleet so as to reduce discards of Merluccius merluccius (European hake) and Parapenaeus longirostris (Deep-water rose shrimp).Two methods to improve the gear selectivity for each of these two species will be tested. The majority of the project will be sub-contracted through a tendering procedure. This project is in line with Council Regulation (EC) No 508/2014 and as outlined in the Operational Programme for Malta - March 2015. | 1/1/2017 | 31/7/2019 | € 200,000.00 | € 150,000.00 | MRS3303 | Malta | Union Priority 1 |
| Mr. Joseph George Bugeja (Modernisation - EMFF 1.20.1) | MLT 000000620 | Article 41.1 - On board Investments [Grande Madre - MLT000000620] | This operation will target the efficiency of the operations of fishing vessel MFA 6022. The 'Grande Madre' is a GRP built fully decked type treble screw fishing vessel having forward enclosed type navigation superstructure and an open working deck abaft.<br><br>**1. Improving the hydrodynamics of the hull of the 9 year old fishing vessel in accordance with article 41.1 (a) of Regulation 508/2014.** This part of the project is aimed to lengthen the "Prim" of the fishing vessel. This will help the fishing vessel to increase the speed and endurance, decrease the drag of sea water and help the vessel to have less friction. These works will also help to decrease the fuel consumption of the vessel.The modifications are not deemed to affect the GT computation of the vessel and they do not affect the principal dimensions of the vessel in accordance with the definitions and procedures of the Merchant Shipping Tonnage Regulations S.L. 243.19. Moreover, the modified keel is believed to provide dampening to roll motions thus improving the safety of the vessel and crew as well as their well-being at sea.<br><br>**2. Improving the refrigeration system of the 11.41 metres fishing vessel.** This part of the project is to change the existing old refrigeration motor installed on the fishing vessel. The new motor will be A++ which will help the vessel to be more energy efficient and environmentally friendly since it could be switched on and off as soon as the temperature required is reached. Moreover, the new refrigerator motor switched off automatically, thus saving about twenty five (25) litres of fuel (diesel) every day. The old compressor worked with 22 gas. The new one will work with 404 gas, this being more efficient. | 1/1/2018 | 30/11/2018 | € 8,534.40 | € 5,067.30 | MRS3303 | Malta | Union Priority 1 |

|---|---|---|---|---|---|---|---|---|---|---|
| Ms. Marianne Mercieca (Modernisation - EMFF 1.20.2) | MLT 00MFA0276 | Article 41.1 - On board Investments [Petmar - MLT00MFA0276] | The current operation encompasses the use of a fishing boat. The fisherman has been operating the boat for the past 11 years. The operation is profitable however there are a number of aspects of the vessel which are encumbering this profitability, such as outdated and old equipment.The purpose is to upgrade and modernise the boat, to improve the efficiency of the propulsion methods and make the operation more efficient and economically viable.<br>The investment in new propeller and engine shaft are being made in order to modernise the current equipment and make the main propulsion parts of the boat more efficient. The most efficient propeller and shaft set up were chosen. This efficiency directly impacts the fuel efficiency of the boat and reduces the emissions created. With the investment in the propellers there is also the need to improve the shafts of the vessel to cater for the new propellers and the cope with the torque being generated by this set-up.<br><br>Investment is also being made in cooling systems which will also improve efficiency of the operation allowing the vessel to remain on site for longer periods instead of having to travel to and from unloading destinations. This investment will replace the old system which has been used for the past 22 years and no longer fits its purpose. | 19/6/2018 | 30/11/2018 | € 19,203.83 | € 11,402.27 | N/a | Malta | Union Priority 1 |
| Mr. Charlo D'Amato (Modernisation - EMFF 1.20.3) | MLT00MFA0154 | Article 41.1 - On board Investments [Madre Teresa - MLT00MFA0154] | The proposed operation that the owners of the Madre Teresa vessel are putting forward falls under the category of investments in equipment or on board. These relate to the following:<br><br>a. Investment in a new steering gear control system with multiple rudders, this investment will lead to the promotion of energy efficiency and the mitigation of climate change in ine with Article 13(1)(c) of the Commission Delegated Regulation № 2015/531.<br><br>b. Installing a new freezing system on board and covering them in a wood structure and coating it in copper to reduce energy losses and this in line with Article 16 (a) of Regulation № 2015/531.<br><br>Therefore, this project involves shaft drive line, propellers and rudders upgrading, all being carried out in order to reduce greenhouse gases and to mitigate the emissions of pollutants. This investment will lead to a marked improvement in boat handling, reduce fuel consumption, improve internal engineering room space and increase safety for all hands-on deck.<br>The new refrigeration and freezing system carries the latest energy savings rating and thus will lead to a huge improvement in energy efficiency but also lead to substantial reductions in emission of pollutants and greenhouse gases. | 1/12/2017 | 30/11/2018 | € 44,860.10 | € 16,391.19 | MXK 1533 | Malta | Union Priority 1 |
| Mr. Denis Incorvaja (Modernisation - EMFF 1.20.4) | MLT00MFA0140 | Article 41.1 - On board Investments [St. Peter - MLT00MFA0140] | This operation will target the efficiency of the operation of fishing vessel MFB 8140. Investments on board the vessel pertain to an autopilot and a throttle. | 15/1/2019 | 30/6/2020 | € 822.96 | € 499.78 | MXK1630 | Malta | Union Priority 1 |

|---|---|---|---|---|---|---|---|---|---|---|
| Department of Fisheries and Aquaculture, Ministry for Agriculture, Fisheries and Animal Rights | N/a | The Construction and Finishing of an Office on the Fish Landing Site in the Marsaxlokk Designated Port | The Marsaxlokk Landing Site shall be a state of the art facility, aimed at facilitating fish landing in the South Eastern region of the Maltese Islands. The building shall house an office where fisheries officers can carry out checks and controls, a small chiller where fish can be stored, and a weighing station facility. The building shall be built following environmental friendly principles also ensuring full accessibility to persons with a disability. This investment shall complement EFF316 project, where the adjacent quay was extended to accommodate more landing vessels and manoeuvrability in the area. | 1/1/2017 | 30/6/2020 | € 561,197.86 | € 420,898.40 | MRS3303 | Malta | Union Priority 1 |
| Transport Malta, Ministry for Transport, Infrastracture and Capital Projects | N/a | Refurbishment and upgrading of slipways in the port of Marsaxlokk | The project shall involve the refurbishment and upgrading of ten slipways within the port of Marsaxlokk. This shall include:<br>- the cleaning of all slipway surfaces from marine growth and other encrustations; - the reinstatement of all cracked, pitted and dilapidated concrete surfaces including the side walls of the slipways on seven slipways;<br>- the lowering of three slipways in order to have their toe submerged in water;<br>- the refurbishment of slipway toes where required, the filling up of scoured areas, and the installation of new timber sleepers;<br>- one slipway shall have its toe extended to accomodate larger fishing vessels<br>This project shall be of benefit to the fishermen using this port by improving these slipways' condition, this fishing port's infrastructure and the fishermen's safety and working conditions. | 1/9/2016 | 30/9/2019 | € 556,840.50 | € 417,630.38 | MRS1917 | Malta | Union Priority 1 |
| Transport Malta, Ministry for Transport, Infrastracture and Capital Projects | N/a | Construction of a breakwater at Qrejten point in the port of Marsaxlokk | The project shall involve the construction of a breakwater at Qrejten point to improve the coastal defences in the Marsaxlokk bay and to provide shelter for vessels operating within this port. This project shall also improve the fishers' safety and working conditions, and decrease the oversall coastal damage caused by strong currents within the Marsaxlokk port. | 1/9/2016 | 28/2/2020 | € 4,126,632.80 | € 3,094,974.60 | LJA2021 | Malta | Union Priority 1 |
| Ministry for Gozo | N/A | Upgrading of the fisheries infrastructure of Gozo | The proposed project shall modernise the fishermen’s facilities located at the designated fishing ports of Mgarr and Xlendi, together with the introduction of new related amenities. Through this investment, local fishermen would start benefiting from better and safer working environment. This eventuality would encourage this cohort to further invest in their operations and in the process improve the quality of their catch. | 30/4/2018 | 31/12/2019 | € 1,320,485.95 | € 990,364.46 | VCT 1335 | Malta | Union Priority 1 |
| Transport Malta, Ministry for Transport, Infrastracture and Capital Projects | N/A | Upgrading of Mgarr Gozo and Marsaxlokk Malta fishing ports | The project shall be carried out at the fishing ports of Mgarr Gozo and Marsaxlokk Malta, whereby through this endeavour these fishing ports will be reorganised, upgraded and expanded. It shall address the dilapidated and unsafe marine infrastructure in these ports which cannot be operated. Through this project, Transport Malta shall be providing a safer working environment for fishers through the installation of new pontoons which shall include new lighting and safety equipment. Furthermore, the current mooring facilities for fishing vessels will be increased thereby increasing the number of safe berths for fishers.<br><br>This project shall also be addressing the financial sustainability of fishers. By allocating them more berthing space there shall be a reduction in the wastage of fuel and time incurred by the fishers to find berthing space where to land their catch. It would also reduce competition for such space as fishers would have more allocated berthing space. Transport Malta shall be investing in these designated ports and provide increased flexibility to fishers and improve operational efficiencies. | 1/1/2018 | 30/9/2020 | € 3,810,968.41 | € 2,858,226.31 | UA 2021 | Malta | Union Priority 1 |

| Department of Fisheries and Aquaculture, Ministry for Agriculture, Fisheries and Animal Rights | N/a | Training for Fishers | A number of high standard training courses shall be provided to all interested registered fishers. The courses shall be aimed at improving the knowledge and skill of local fishers, targeting to increase the overall standard of the loval fishing industry. Courses and seminars are projected to start during the first quarter of 2018; such activities are projected to span over a period of four months. This project shall also include an awareness media campaign, aimed at encouraging course participation. A number of mediums shall be used including: informative application letters to be sent to all professional (MFA/MFB) fisher vessel owners, posters, roll up banners and also television adverts. An information session will also be held to bridge the gap with potentially interested applicants, thus answering any difficulties or queries one might have and aiding applicants in the filling in of application forms. The Department will also be working with cooperatives and other relevant entities to facilitate the dissemination of information and increase awareness at end user level, hoping to maximse the course participation.<br>After all courses and seminars are delivered, a closing ceremony will be held where all participants will be handed over participation certificates and respective certifications. A gift pack will be also given to all attendees which shall include items related to health and safety. | 1/6/2017 | 31/06/2020 | € 500,000.00 | € 375,000.00 | MRS3303 | Malta | Union Priority 1 |
| Carmel and Mario Carabott | MLT00MFA0009 | Compensation Scheme for the Temporary Cessation of Fishing Activities | The main scope of the scheme is to enhance the recovery of the Swordfish stock by extending the closed season by one month (1st December – 31st December). This is being done as an additional conservation measure, over-and above the obligatory closure period referred to in Article 10(1) of Regulation (EU)2019/1154 on a multi-annual recovery plan for Mediterranean swordfish and amending Regulations (EC) No 1967/2006 and (EU) 2017/2107. Apart from the decrease in fishing effort on the Swordfish fishery, there will also be a decrease in the general fishing effort on the other fish stocks. This is due to the fact that the fishing vessels concerned will have to stop any fishing activities during the period concerned by the temporary cessation. | 15/11/2019 | 31/12/2020 | € 5,915.10 | € 2,957.55 | N/a | Malta | Union Priority 1 |
| Francis Carabott | MLT00MFA0055 | Compensation Scheme for the Temporary Cessation of Fishing Activities | The main scope of the scheme is to enhance the recovery of the Swordfish stock by extending the closed season by one month (1st December – 31st December). This is being done as an additional conservation measure, over-and above the obligatory closure period referred to in Article 10(1) of Regulation (EU)2019/1154 on a multi-annual recovery plan for Mediterranean swordfish and amending Regulations (EC) No 1967/2006 and (EU) 2017/2107. Apart from the decrease in fishing effort on the Swordfish fishery, there will also be a decrease in the general fishing effort on the other fish stocks. This is due to the fact that the fishing vessels concerned will have to stop any fishing activities during the period concerned by the temporary cessation. | 15/11/2019 | 31/12/2020 | € 5,325.70 | € 2,662.85 | N/a | Malta | Union Priority 1 |
| Alexander Morino | MLT00MFA0063 | Compensation Scheme for the Temporary Cessation of Fishing Activities | The main scope of the scheme is to enhance the recovery of the Swordfish stock by extending the closed season by one month (1st December – 31st December). This is being done as an additional conservation measure, over-and above the obligatory closure period referred to in Article 10(1) of Regulation (EU)2019/1154 on a multi-annual recovery plan for Mediterranean swordfish and amending Regulations (EC) No 1967/2006 and (EU) 2017/2107. Apart from the decrease in fishing effort on the Swordfish fishery, there will also be a decrease in the general fishing effort on the other fish stocks. This is due to the fact that the fishing vessels concerned will have to stop any fishing activities during the period concerned by the temporary cessation. | 15/11/2019 | 31/12/2020 | € 6,327.24 | € 3,163.62 | N/a | Malta | Union Priority 1 |

| Malta Fish Farming Limited | N/A | Increasing productivity, efficiency and sustainability of Blue-fin tuna fish farming operations | Due to the increasing quotas in Blue-fin tuna farming year on year according to ICCAT recommendations, as well as an increase in demand for Blue-fin tuna by various global markets, MFF Ltd realised that there was potential for growth and increased productivity which led the company to relocate its Tuna Fish-farms further out at sea.<br>This move 6 km away from the shore let to the creation of greater spaces in which the company could operate and offered better conditions for the tuna being farmed. This move however also involved various upgrades in the infrastructure due to the conditions present further out at sea which include deeper seas and stronger currents.<br>Furthermore the investment made would provide a basis for further development of aquaculture species, and the production of an improved product as well as a higher demand within the global market, allows MFF to stay ahead of its competition and supply a product at the standards expected globally. | 6/6/2015 | 31/12/2020 | € 7,247,838.39 | € 1,625,749.04 | MXK1522 | Malta | Union Priority 2 |
| Department of Fisheries and Aquaculture, Ministry for Agriculture, Fisheries and Animal Rights | N/a | Nesploraw Flimkien it-Teżori tal-Baħar!' | Nesploraw Flimkien it-Teżori tal-Baħar! is a promotional campaign launched by the Department of Fisheries and Aquaculture in partnership with the Department of Curriculum, Research, Innovation and Lifelong Learning and the National Literacy Agency, both falling within the remit of the Ministry for Education and Employment.<br><br>Together, the project promoters have developed an educational animated cartoon video clip accompanied by an illustrated educational book and a hand-glove puppet of the campaign mascot. These educational resources have been distributed to primary schools in Malta and Gozo and are expected to be utilised as primary teaching resources (year 3 and year 4) in the scholastic years to come.<br><br>The campaign, apart from targeting primary school pupils, targets the general public through the broadcasting of adverts on diverse mass media platforms. An open-weekend is planned to be organised at the end of June, 2018, where different stakeholders will be invited to disseminate information to the general public.<br><br>The campaign seeks to communicate three principle messages:<br>(i) Awareness of the state of the local fish stocks;<br>(ii) Sustainable fish consumption;<br>(iii) The role of each individual in assisting conservation efforts. | 1/6/2017 | 31/12/2018 | € 250,000.00 | € 187,500.00 | MRS3303 | Malta | Union Priority 5 |
