EFF 311	Upgrading of Landing Facilities at Mgarr, Gozo	MSDEC	Upgrading of Landing Facilities at Mgarr, Gozo	The project aims to improve the fisheries control activities by making the process more efficient and less time consuming. The objective is 1) to facilitate the direct 24-hour control of landing activities by permitting, in the future, the permanent accommodation of fisheries control officers at the landing sites, 2) to improve the working conditions of the fisheries control officers as no structure exists at the landing sites to accommodate, even temporarily, the fisheries control officers during the carrying out of their duties; and 3) to facilitate the control of fisheries products whilst reducing to a minimum the handling of fish along the quay.	Set-12	Diç-14	109,287.51	81,965.63
EFF 312	The Building of a fish market and the infrastructure of a marketing and processing plant	MSDEC	The Building of a fish market and the infrastructure of a marketing and processing plant	The scope of the project is to relocate the auction sale activity to a more modern structure with high hygiene and health and safety standards. The facilities at the new fish market are designed to improve the quality of fresh fish and fish products at point of sale by including a wholesale fish market and a fish processing plant under one roof.	Nov-12	Ġun-15	2,935,877.00	2,201,907.75
EFF 313	Enhancing Fish Consumption through Education/Awareness & Diversification	MSDEC	Enhancing Fish Consumption through Education/Awareness & Diversification	This project seeks to enhance fish/fish products consumption by: (i) increasing awareness among the general public of the health benefits associated with fish consumption; and (ii) enhancing the demand for currently underutilised fish and/or aquaculture species and consequently improve the sector's competitiveness and help it become environmentally, economically and socially sustainable. EFF 314	Installation of Service Pillars	MSDEC	Procurement of Service Pillars at Xatt is-Sajjeda Maraxlokk	The EFF was used to support the upgrading of amenities at Xatt is-Sajjeda Marsaxlokk which is one of the Maltese Designated Ports. This is a collective action for the fishing community in Marsaxlokk. The investments provide water and electricity services for fishermen.	Jan-11	Diċ-11	53,258.63	33,850.82
EFF 315	Upgrading of Designated Ports at Marsa, St. Paul's Bay and Marsascalea	MSDEC	Upgrading of Designated Ports at Marsa, St. Paul's Bay and Marsascalea	The infrastructure of the Saint Paul's Bay designated port will be upgraded by repairing and upgrading of the fishing shelter at the tal-Vecċja Site and by developing a landing site having a permanent office structure to house the officer carrying out the controls. Accessibility will also be improved by repairing an additional slipway near this shelter. Another slipway will be repaired at the Marsascalea designated port to provide better accessibility at this port. A landing site will be developed at the Marsa designated port to service the new fish market being built.	Diċ-13	Mar-15	553,376.00	415,032.00
EFF 316	Development of Infrastructure at the Marsaxlokk Designated Port	MSDEC	Development of Infrastructure at the Marsaxlokk Designated Port	The project involves the development of the necessary infrastructure at the designated fishing port of Marsaxlokk by creating a platform to allow for the landing of fish in a safe and orderly manner. The platform will be reclaimed from the sea and will allow for the berthing of fishing boats.	Diċ-13	Mar-15	473,526.00	355,144.50
EFF 317	Upgrading and Development of the Fisheries Infrastructure in Marsalforn	MGOZ	Upgrading and Development of the Fisheries Infrastructure in Marsalforn	The proposed project envisages the upgrading of the existing slip way and dry standing area as well as the repair of the menqa wall. It also foresees the construction of a new dry standing area, the establishment of a landing office, replacement of the winch by a modern one and the installation of service pillars in the port of Marsalforn.
