

Clarification No 1:

With respect to the quote in caption, the individual(s) must be in possession of a recognised Bachelors' qualification at MQF Level 6 or higher in Commerce, Management, European Studies and related areas. Would someone with an MQF level 7 in economics and/or MQF level 7 in environmental economics be perceived as a related area?

FPD's reply:

Economics is related to commerce; however environmental economics is not considered related.
