

AQUARES

Water Reuse Policies Advancement
for Resource Efficient European
Regions

**THE
ENERGY
& WATER
AGENCY**

Project Ref: PG105592

Michael Schembri, Senior Policy Officer, Energy
and Water Agency

The project in numbers

Duration: 60 months

Number of Partners: 10 (9 countries)

Total Budget: Eur1,967,086

EWA budget: Eur210,754

Project Objectives

Promote resource efficiency through water reuse

Facilitate the adoption of water reuse technology in the expanding water market

Secure the protection of water bodies

Main Outputs

The development of action plans to improve current and future policy instruments to enable reuse

The identification of EU financing tools which allow for the market integration of water reuse technologies

Promote public dialogue and increased awareness and consensus building to support measures for water reuse

Additional benefits

- a) Capacity building on sustainable water management and supply schemes

- b) Exchanging of good practices at EU level to support the reuse of treated sewage effluent
